

## **Active Dashboard 2 allows easy access to process performance data**

### **Advanced software solution ensures superior manufacturing quality and enables effective decision-making**

Goettingen, Germany / Malmö, Sweden – June 26, 2017: Sartorius Stedim Biotech (SSB), a leading international supplier to the biopharmaceutical industry, has launched the Active Dashboard 2, an advanced software solution. Offered by its subsidiary, Sartorius Stedim Data Analytics, formerly known as Umetrics, the release features significant improvements for applications in biopharmaceutical, pharmaceutical, and other manufacturing industries. Delivering in-depth insights into process performance across the manufacturing network, managerial staff can take evidence-based proactive actions that will help to achieve better timely decisions, ensuring superior manufacturing success.

Active Dashboard 2 provides real-time process information from multivariate SIMCA®-online data analysis systems – part of the Umetrics™ Suite of Data Analytics Solutions. The Active Dashboard 2 software now offers innovative data visualization options, such as easy self-service visual analytics with cross-filtering to reduce the involvement of data analysis experts; role-based display of relevant information; and the ability to connect to other data sources. In addition, management and other authorized employees can now visualize process information on any laptop, tablet or smartphone with a web browser.

"The improvements in Active Dashboard 2 will help our customers to enhance their competitive advantage – both globally and locally. With in-depth insights into data of their manufacturing processes, they can significantly improve the decision-making process," stated Jonas Elfving, Product Manager at Sartorius Stedim Data Analytics.

Sartorius Stedim Data Analytics is a leading provider of data analytics with multiple applications in high-tech industries worldwide. Its product and service portfolio enables customers to maximize the value of their data during the entire product lifecycle, facilitating better decision-making and process excellence.
